Title: PRINT PROCESSING SYSTEM AND METHOD WITH INTERFACE ADVERTISING**IN THE CLAIMS**

Please cancel claims 27, 28, 38, 39, and 40 without prejudice.

Please amend claims 1, 11, 21, 22, 24, 33, and 34 as follows:

1. (Currently Amended) A method of processing a print job of a customer and directing advertising to the customer, the method comprising:

defining a print processing system controller having an advertisement registered therewith;

defining a network communication link between the customer and the print processing system controller and communicating an interface of the customer with the print processing system controller via the network communication link;

processing a job ticket for the print job with the print processing system controller; and

presenting the advertisement to the customer via the network communication link when the print processing system controller processes the job ticket for the print job, including displaying the advertisement for the customer on the interface of the customer.

2. (Previously Presented) The method of claim 1, wherein defining the network communication link includes defining an Internet communication link between the customer and the print processing system controller.

3. (Previously Presented) The method of claim 1, wherein the print processing system controller has a plurality of advertisements registered therewith, and wherein presenting the advertisement to the customer includes presenting at least one of the advertisements to the customer via the network communication link.

4. (Previously Presented) The method of claim 3, wherein processing the job ticket includes receiving a plurality of attributes for the print job at the print processing system controller via the network communication link, and further comprising:

selecting the at least one of the advertisements based on at least one of the attributes for the print job.

5. (Original) The method of claim 4, wherein receiving the plurality of attributes for the print job includes receiving at least one of a file format, a number of copies, a print medium, a printing layout, a printing quality option, a color printing option, a finishing option, a delivery option, and a customer identification for the print job.
6. (Previously Presented) The method of claim 1, further comprising:
registering the advertisement with the print processing system controller.
7. (Previously Presented) The method of claim 6, wherein defining the network communication link includes defining the network communication link between at least one advertiser, the customer, and the print processing system controller, and wherein registering the advertisement includes registering at least one advertisement of the at least one advertiser with the print processing system controller via the network communication link.
8. (Previously Presented) The method of claim 6, wherein registering the advertisement includes storing the advertisement, and wherein presenting the advertisement includes retrieving the advertisement.
9. (Previously Presented) The method of claim 1, wherein processing the job ticket includes receiving the job ticket for the print job at the print processing system controller, and wherein presenting the advertisement includes presenting the advertisement to the customer via the network communication link when the print processing system controller receives the job ticket for the print job.
10. (Previously Presented) The method of claim 1, wherein processing the job ticket includes generating and submitting the job ticket for the print job to the print processing system controller, and wherein presenting the advertisement includes presenting the
